

MindEdge Category Finance Video Transcription

Every manager, even those in non-financial positions, should have a fundamental understanding of Finance. The numbers tell the story and when you're at the table to discuss the health of your company, understanding what the numbers mean is crucial to making smart and defensible decisions. MindEdge's Finance certificate and coursework offers a tour of financial statements, budgeting, time value of money, risk, and other important topics. Financial Planning and control means being able to calculate return on investment, payback period, and a break-even point. Breaking down these topics into easy-to-understand lessons with infographics, exercises, and games means you will finally master the vocabulary of basic finance. With highly engaging content, a mobile-friendly platform, and video by Finance experts, MindEdge courses give you the tools you need to translate Financial Concepts and calculations into real-world business indicators. MindEdge Finance courses... The numbers tell the story, learn what they are saying.
