

Learning Resources

At the Cappi Wadley Reading and Technology Center, we are dedicated to providing everyone with the tools they need to reach their learning goals. With 16 individual computer rooms, 5 family reading rooms, 3 group study pods, 3 classrooms, and a large reading library, we are equipped to meet the learning needs of a variety of students.

Special Events

In addition to our day to day resources, we also host special events each semester focused on making learning fun and exciting for the whole family. Be sure to follow The Capitola “Cappi” Wadley Reading and Technology Center on Facebook for more information on Family Literacy Nights, guest authors and presenters, and special activities.

Face-to-face Tutoring

Face-to-face tutoring is provided primarily through our READ 4013 and 4063 courses. Teacher candidates in those courses assess children and tailor instruction based on that assessment. Teacher candidates work with children for one hour per week for ten-twelve weeks. Other face-to-face tutoring is provided through trained volunteers.

Read Live

Read Live efficiently applies the research-based Read Naturally Strategy to accelerate reading achievement. Visual and auditory prompts guide students through steps to develop fluency and phonics skills, support comprehension, and improve vocabulary. Students build fluency and motivation by reading short, nonfiction passages, and increase reading accuracy and expression with audio support. Read live helps students experience success and an improved attitude toward reading.

Moby Max

MobyMax finds and fixes learning gaps with personalized learning. Its adaptive curriculum creates an individualized education plan for each student, allowing gifted students to progress quickly and ensuring that remedial students get the extra instruction as needed. MobyMax is utilized in both reading and math tutoring.

Mindplay

MindPlay Virtual Coach teaches students to comprehend grade level text and to read text fluently. It uses strategies of successful teachers and speech pathologists to help struggling readers read.

Reading Eggs

Reading eggs supports each child's learning by offering individual lessons. The Reading Eggs program focuses on five core reading curriculum: phonemic awareness, phonics, vocabulary, comprehension, and fluency. ReadingEggs uses skills and strategies for sustained reading success.

Headsprout

Headsprout is an online kids reading program for K-5 students that provides one adaptive, individualized reading solution. This is designed to instill phonemic awareness, phonics, fluency, vocabulary, and beginning comprehension.

Duolingo

Duolingo is a language learning —platform website. Duolingo is available in English, Spanish, Japanese, Chinese (Mandarin) and many other languages.

Dual Language Library

We have a number of books in English, Spanish, and dual text editions, and a large collection of audio books. Read the English copy while referring to the Spanish text for help understanding English words and phrases.

ESL Assistance

Our ESL options are built to provide a range of choices for improving English skills with language lessons in our educational software, immersive learning lessons through Duolingo, or reading and listening with our extensive book and audio book library. Using any or all of these options helps develop the skills needed in the language learning process.
