Blackboard Course Accessibility Checklist

The following checklist will guide you through the steps necessary to ensure that your course is accessible to your Blackboard course participants.

Course Design

Course Menu Buttons

- High contrast between text color and background for best readability
Note: Choose dark text on a light background
- Patterned buttons are not used
Note: Patterns are difficult to read

Course Links

- Descriptively and consistently named
Note: Avoid the usage of text "click here" or "more"
- Used to help students navigate
- High contrast between text color and background
- Buttons and tools not used are hidden or removed
Note: Since Screen readers read every link on a page, it is important to turn off unused icons and tools so that students do not need to listen to unimportant links from their screen reader

Course Layout

- Course and content layout is organized and consistent to provide easiest access to materials

Course Content

Assessment

- Grade Center columns are displayed in relevant, coherent order
- Consult with the department of Disability Resource Services for students in need of extended assessment and exam times

Documents

- If PDF is used, a Word or plain text version is also provided or made easily available.
- Linked titles for documents attached in Bb include the file extension in the title such as doc or rtf.
- Summaries are provided for data tables
- Data tables include identifying headers
- Class Syllabus includes Accessibility Statement for students

Práctica de escribir un correo electrónico

Read - You are applying for a job at a summer camp, community center, or sporting goods store. Write an email to your potential employer telling why you're a good candidate for the job. The email should be at least 8 sentences in Spanish. Include the following information:

- a greeting
- where you are from
- activities you like to do
- when, where & with whom you do each one
- activities you know how to do
- what you know who can help you learn new skills if you get the job
- activities you are going to do soon
- when, where & with whom you are going to do each one
- what the weather is like for your favorite activities
- don't forget to say good-bye!

Remember that you need to focus on using your vocabulary! Using your vocabulary will ensure you are ready for the test! Do not use a translator or a dictionary. You have everything you need to write this email in your notes.

Poster Title: SMARCAL1 reduces replication stress at ALT telomeres

Kelli E. Cox¹, Alexander Mersbach¹, Rachel L. Jones-Peters¹

Cancer cells overcome replicative senescence by exploiting mechanisms of telomere elongation, a process often accomplished by activation of the enzyme telomerase. However, the identification of cancer cells that promote telomere elongation in the absence of telomerase led to the discovery of the Alternative Lengthening of Telomeres (ALT) pathway, a recombination based mechanism of telomere elongation. Although the mechanisms regulating ALT activity have not been fully defined, chronic replication stress at telomeres may prime these already fragile regions for recombination. Here, we have identified the replication stress response protein SMARCAL1 as a critical regulator of ALT activity. SMARCAL1 associates with ALT
